DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4-12, 15-17 and 20-24 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Morgan (5,574,738). In Fig. 1, Morgan teaches a vertical cavity surface emitting laser, comprising: an optical cavity adjacent a first DBR mirror (16); an emitting mirror (26) adjacent said optical cavity; a mode defining aperture (29) for controlling transverse modes; an absorbing layer (25), of semiconductor material doped P-type, integrated within the emitting mirror, wherein said absorbing layer is laterally located within at least a portion of said mode defining aperture. In Column 4 lines 32-58 Morgan teaches a selection of materials, thickness and locations for the absorbing layer. In column 4 lines 59-67 and Fig. 4, Morgan teaches a three terminal version and thus this meets the limitation of an intracavity contact as set forth in claim 9.

Allowable Subject Matter

3. Claims 2, 3, 13, 14, 18 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

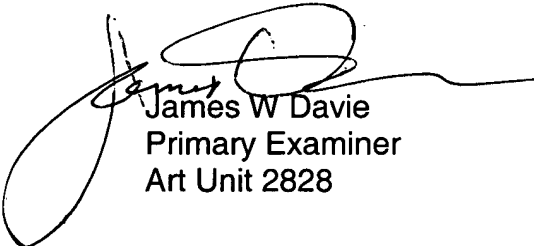

Conclusion

4. Applicant should update the status of the application referenced on page 9, line 22.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James W Davie whose telephone number is (571) 272-1939. The examiner can normally be reached on M-F 9-5:30.
